TEAM PROBLEM - Site 2
CODE NAME - "All Choked Up? Come On... Get It Off Your Chest"

Team ID Number: _____

Team Members: _____ Category: _____

Problem Statement

Being attracted to the site from the screams of pain, you find yourself looking down into a mechanic's pit where two mechanics had been working on the transmission of a bus. Something must have happened as you find one of the mechanics lying on his back, trapped with a heavy load on his chest, while the other mechanic appears to be in distress as he grasps his throat.

Casualty Simulation**PATIENT ONE**

CONSCIOUS lying on BACK
FRACTURE to right shoulder
Signs of Shock - SWEATING; PALE
INTERNAL BLEEDING to Abdomen

PATIENT TWO

CONSCIOUS to UNCONSCIOUS CHOKING (gum)
Signs of Shock - SWEATING; PALE
LACERATION to distal right lower leg

History

While installing or removing a transmission, one of the mechanics was chewing gum. During the removed of the part, with the mechanics looking upward, one of the mechanics begins to choke on his gum, dropping his arms and dropping his end of the part.

With the total weight of the part being transferred to the other mechanic, this mechanic loses his balance and falls backward with the transmission part falling on top of the second mechanic.

Team Number: _____

Judging Notes:

- Assist team with prompting if casualty does not respond properly.
- Ensure that transmission prop is properly placed onto of first mechanic
